

About Me

Software Engineer with over **3 years** of experience building and maintaining scalable, nationwide systems in the fuel-retail POS domain. Strong frontend and backend focus with hands-on experience in NestJS, Laravel, VueJS, AWS, and distributed architectures. Proven track record of delivering production-ready solutions used by thousands of fuel stations across Malaysia, including Petronas, SHELL, and BHPetrol.

Education

UNIVERSITI KEBANGSAAN MALAYSIA

2019 - 2023

Bachelor of Software Engineering (Information System)

First Class Graduate with **CGPA 3.76**

Relevant Course: Computer Programming, Databases Design, Software Design for Information System, Mobile Programming, Web Programming, Data Engineering, Software Testing, Discrete Mathematics, Software Requirement Engineering, Platform Technology, Data Analytics, Statistics & Probability

Technical Skills

- **Programming** : PHP, JavaScript, TypeScript, HTML, CSS
- **Framework** : NodeJS, NestJS, Laravel, Livewire, VueJS, Jest, Cypress, Tailwind
- **Database** : MySQL, NoSQL, MongoDB
- **Tools** : Git, Gitlab, JIRA, Confluence, Microsoft Teams
- **Devops & Cloud** : Gitlab CI/CD, Docker, Kubernetes (Basic), AWS Services (Lambda, SQS, Kinesis, DynamoDB, Cloudwatch)

Work Experience

Planned Career Break / Self

2026 - Present

Employed

Feb 2026

Freelance

- Freelanced for SOCSO to deliver a Malaysia Labour Market Dashboard using Power BI, covering DAX measures, data modelling, and six analysis themes including salary gap, skills demand mapping, and sector wage competitiveness.
- Assisted in security hardening for GeoMotion Malaysia to remediate BHP audit findings, including API hardening via rate limiting and AWS WAF ruleset, CICD pipeline integration of code scanning tools (Grype, GitLab SAST, pip-audit), and implementation of Content Security Policy (CSP) and Subresource Integrity (SRI).

SILENTMODE SDN.BHD.

Software Engineer

2024 - 2026

Aug 2025 - Feb 2026

- Handled supports and bugs related to the BOS system.
- Developed features and core functionalities focused on backend using NestJS, Jest, Docker, AWS.
- Worked in concurrent multiple projects setting, sprint-based development with daily & weekly scrum meetings.
- Handled supports, development tasks and deployments using CICD.
- Started as developer for **E-Invoice System** which later on transitioned to Maintainer.
- Volunteered for vacant positions of another system called **HUB** - learning from scratch and appointed as **HUB Lead**. Now having a subordinate and providing assistant and mentorship.
- Given trust to join another team's project, **Subsidy RON95 Project** development team to assist in developments.
- Currently holding 3 crucial roles ; maintainer for E-Invoice system, HUB Lead under client BHPetrol and developer for Subsidy RON95 Project

TERATO TECH SDN.BHD.

Junior Software Engineer

2023 - 2024

Jan 2023 - August 2024

- Absorbed from the intern position.
- Outsourced to Silentmode Sdn. Bhd.(sister-company) having developed full stack reporting features for a web-based reporting system called **Back Office System (BOS)** which is part of **RONPOS** - a fuel retail POS solution.
- Implemented Laravel, VueJS, MySQL, multi-tenant architecture in day-to-day practices.
- Developed multiple reports such as Fuel Totalizer Report, Sales Movement Report which both went to production and being used by 1000+ Petronas stations nationwide - helping retailers in analysing and planning their business.
- Enhance existing features such as Planogram bulk and custom generation called Electronic Shelf Label (ESL) which you normally see product bar code in Mesra Store.
- Handled supports and bugs related to the BOS system.

TERATO TECH SDN.BHD.

Software Engineer Intern

2022 - 2023

Sept 2022 - Jan 2023

- Fullstack intern developed features for in-house product development, mostly utilizing Laravel Livewire, CSS, AlpineJS.
- Developed multiple backend features, enhancing current workflows and fixing bugs raised by internal QA.
- Also worked as Mobile Engineer utilizing React Native, converting multiple Figma design into working application - managed to complete minimum viable product (MVP) during internship tenure.

Project Involvements

E-Invoice System

Silentmode Sdn. Bhd

2024 - 2026

- A system to do client-supplier submissions to LHDN developed for SHELL, BHPetrol & Petronas. Used by retailers and customers in petrol stations nationwide. Is a microservice of **Fuel-Retail POS** called **RONPOS**.
- Developed the front end for almost 90% of the system which include Submission, Supplier/Buyer setup, Receipt-details page etc using *VueJS*.
- Implemented backend services for crucial features, like receipt processing, submission processing using NestJS CQRS and AWS Lambda which integrated with LHDN SDK Api.
- Adept Domain-driven design, Strategy Pattern and CQRS with NestJS, Serverless Architecture with AWS Lambda, SQS, Kinesis and DynamoDB.
- Proper end-to-end testing implemented using *Jest*, *Cypress* and *vue-testing* library
- Developed *YAML* script for *Gitlab* *CICD* and handle staging, UAT and production deployments.
- Use LocalStack to simulate AWS services locally using docker.
- Successful deployments of 400+ fuel stations nationwide across Malaysia.

HUB System

Silentmode Sdn. Bhd

2024 - 2026

- Pick up from scratch, proceed to be appointed as HUB Lead under team *BHPetrol*.
- A center for every crucial processing happens such as receipt, drawer session processing. Is a backend that serves API for mobile apps on POS and integrated with multiple external integration such as *Invenco EPS* and *ITL* for fuel forecourt controller service.
- Built on NestJS, and deployed locally as dockerize container on site. Unit and e2e test utilizing *Jest*.
- Handle bug fixing on multiple domains such as card setup, reporting, loyalty points calculation etc. bulk-generate their shelf label. You can see this in the Mesra store.
- Involved in development to support Subsidy RON95 transactions with integration to external integration such as *TouchNGo*.
- Handle deployment and release notes

CloudBOS System

Silentmode Sdn. Bhd /

Terato Tech Sdn. Bhd

Jan 2023 - May 2024

- A cloud-web based system utilizing AWS services for marketing, analytics and payments. Built on Laravel, VueJS, MySQL (RDS) practising multi-tenant architecture. It is used nationwide on 1000+ SHELL, Petronas & BHPetrol fuel stations.
- Developed multiple reporting features that involve crucial SQL query of over 5 billions rows. Successfully deployed to production and having clients benefitted. Some of the reports are Fuel Totalizer Report which track total fuel dispensing over time from a hose. Also, Sales Movement Report where retailers can manage and plan their stock receiving.
- Enhance current existing feature of generating shelf label, which now retailers can custom inputs and bulk-generate their shelf label. You can see this in the Mesra store.
- Fixing bugs, defects and investigation support coming from clients through BA, Q

Betaqwa CMS

Terato Tech Sdn. Bhd

2024

- An inhouse product developed to manage masjid, kuliah, event and have a mobile app for users to easily access nearby masjid and participate.
- Backend built on Laravel Livewire, AlpineJS, MySQL. Front end on Blade HTML. Mobile Apps utilize React Native, Typescript, NativewindCSS and Redux for state management.
- For Mobile, converted multiple figma designs into working app finishing the Minimum Viable Product having features such as find Masjid, Kuliah Listing, Masjid Detail. Masjid info utilized public API.
- Enhance current flow of backend's content management system (CMS), fixing bugs on existing features.
- Introduced new features to bulk import Kuliah Listing using Google Sheet. Admin Masjid can import using a templated Sheet.
- Developed a new interface for pages on the CMS including for Masjid Detail Listing

Certifications

[Certified Kubernetes Administrator](#)

Issued by The Linux Foundation

[Certified DevOps Foundaton](#)

Issued by CCSD Council Europe

[Test-first - Drive Clean Code with Automated Unit Tests](#)

Issued by Udemy (Instructor: David Bieder)
